

UMBRELLA STRAW

This umbrella straw will keep your drink cool and bug-free.

You'll need: Scissors, crayons, paper punch, glue stick, and a drinking straw

1. Color the umbrella. *You don't need to color the shaded area.
2. Cut out the umbrella.
3. Choose any dashed line and fold the umbrella in half, folding down. Open and lay flat. Fold in half on a different dashed line. Repeat until you have creased each dashed line.
4. Do the same thing with the dotted lines, but fold up on each dotted line.
5. Cut the black solid line. Punch a hole at the top of the line, in the middle of the circle.
6. Glue the shaded area. Overlap the left section and press it down on the glued area to make the umbrella.
7. Slide the paper-punched circle over a straw.
