

INDOOR ICE GAME

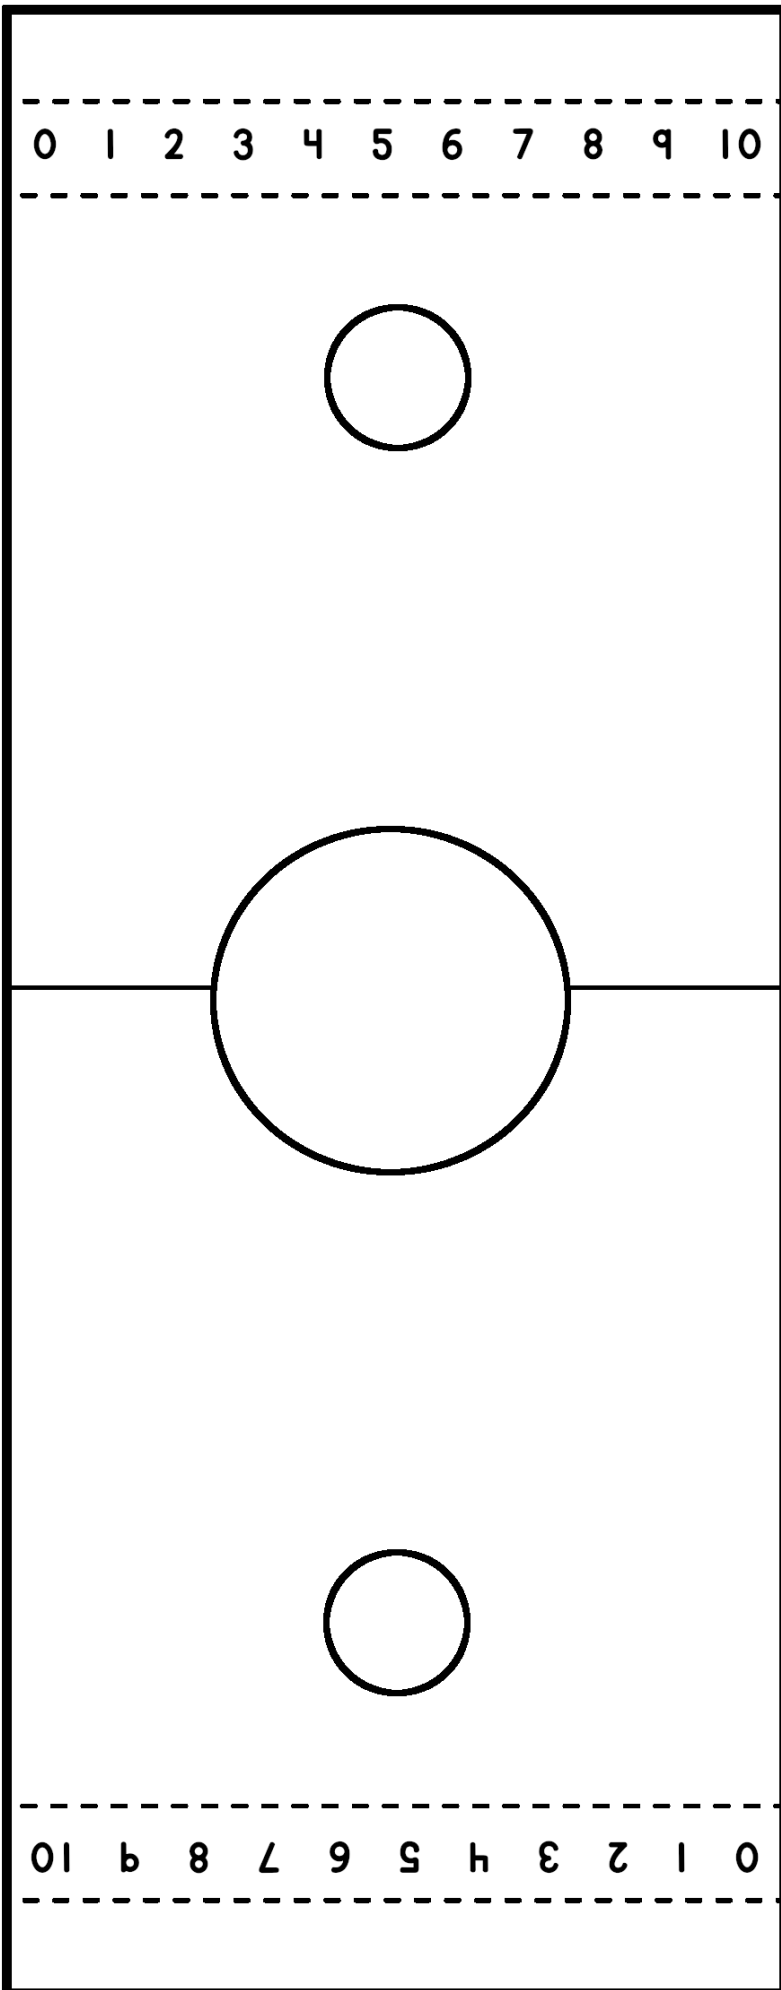

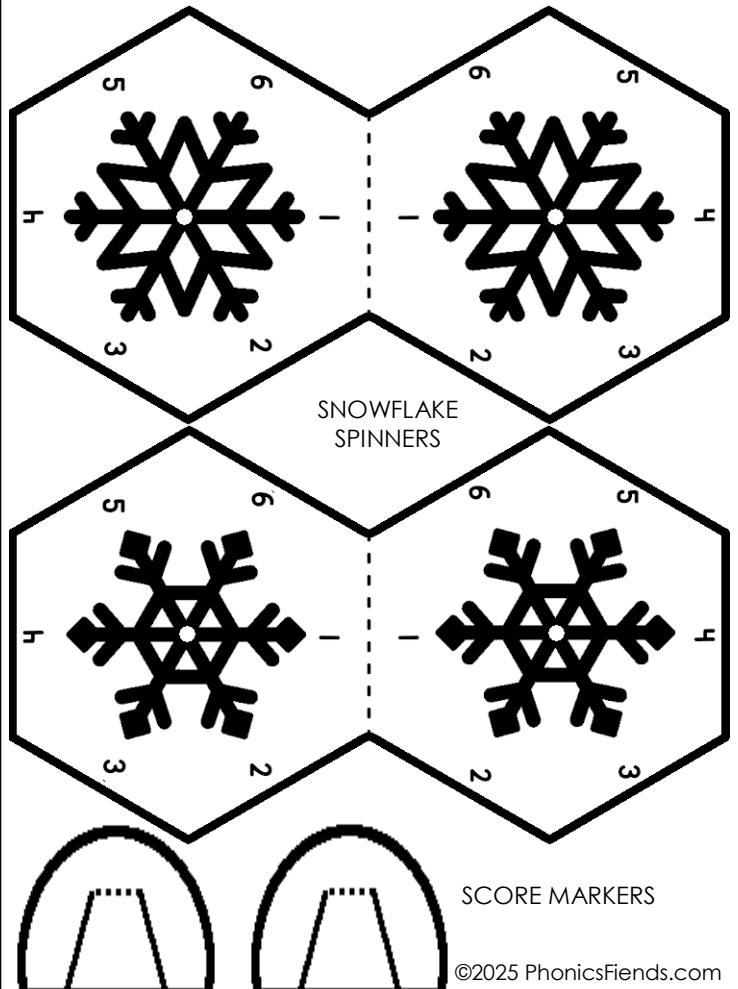

You'll need: Colored pencils, scissors, 2 toothpicks, thumbtack

1. Decorate the game board and spinners.
2. Cut out the game board. Fold forward on each dotted line below the numbers and back on the line above the numbers.
3. Cut out the score markers (half circles). Cut the slits up to the dotted line. Place one on each folded end of the game board, like a paperclip.
4. Cut out the snowflake spinners. Fold back on the dotted line. Push a thumbtack through the center hole. Remove the thumbtack. Push a toothpick through the center hole.

TO PLAY:

1. Both players put the tip of their snowflake spinner in the circle on their side of the game board.
2. Spin your spinners at the same time. (Put the top of the toothpick between your thumb and forefinger, twist and let go.)
3. When the spinners stop spinning and fall onto the game board, each player checks the number they spun. (Your number is the one that is touching the game board.) The player with the highest number wins, but must subtract the number their opponent got from their number to calculate their score. Slide the score marker to mark your points. Play again.
4. The first player to 10 points, without going over, wins.
