

RAINBOW RULERS

Use these rulers to create 3 perfect rainbows in 3 different sizes.

You'll need: Paper, scissors, paper punch, glue stick, tape, pencil, colored pencils

1. Cut out each ruler. Fold each back on the dotted line to make a thicker ruler. Glue the inside and press to flatten.
2. Use a paper punch to punch the 8 marked holes in each ruler.
3. Place a sheet of paper on the table, horizontally. Tape the upper corners to the table to hold the paper in place. Draw a dot at the bottom center of the paper.
4. Place the ruler on the sheet of paper with the circle labeled, "pencil point" over the dot you drew. Put a pencil in the circle to hold the ruler in place.
5. Place a red pencil point in the hole labeled red. Hold the ruler in place with the regular pencil while moving the ruler to draw an arc with the red pencil.
6. Draw an arc with each color. (Always hold the pencil in place on the dot you drew at the center bottom of the paper.)
7. Once you've finished drawing the lines of the rainbow, you can use the colored pencils to decorate each band of the rainbow.
